With a view of sharing a common desire to explore, extend and strengthen the functional relationship between the Universities and National laboratories, Industrial houses, well established R & D set up(s) in order to share the facilities and expertise available with each of them, the educational Institutions may enter in to MoU on following broad understanding:

2. In general, there are three broad levels of cooperation with other Higher Education Institutions which may be supported and formalised through:

2.1 Letters of Cooperation or Agreement:

- 2.1.1 Letters of Cooperation or Letters of Agreement may be worked out between Schools/Faculties of the same University/Institution and those in other institutions. It may be defined as:

"An agreement between two or more Departments/ Institutions /Industries/ parties on a specific area or narrow set of areas that do not constitute a legally binding document but instead can recognize that cooperating would be mutual benefit and would serve as an indication of continued interest in joint projects"

- 2.1.2 These Letters of Cooperation should be agreed by the rules set within the Universities/ Departments/Organizations. Letters of Cooperation are often signed in advance of an M.O.U. as a means of agreement on general cooperation.

2.2 Memorandum of Understanding:

- 2.2.1 A Memorandum of Understanding (MOU) is an overall facilitating document linking the University/or any Educational organization or one of its designated units with another institution(s)/Industries.

- 2.2.2 An MOU is between the University and the other body on behalf of a School, Faculty or Centre. Recognizing that MOUs are intended to facilitate future cooperation, it is important to address potential obstacles at the time the MOU is being developed. A "Memorandum of Understanding" or MOU can be defined as:

"A legal document describing an agreement between parties----- it expresses a convergence of will between the parties, indicating an intended common line of action, but which can have a direct effect on the University including that of a legal commitment. It is more formal alternative to other mechanisms such as "Letter of consent" or "Letter of Cooperation"

- 2.2.3 An MoU may be signed between the collaborating Universities/institutions/

organisations for a period as may be agreed to, spelling out the modalities of the collaboration/association on the types of activities.

2.2.4 Due Diligence for an MOU:

2.2.4.1 Due Diligence is the process by which the organisation that the University/Organization is proposing to work with is deemed to be a valid, suitable and timely partner. Where an organisation approaches the University/Educational organization with the intention of presenting joint programmes, a faculty member designated by the University will take responsibility for liaising with the institution, and will act as the 'proposer' for the partner, and must supply information with any MOU proposal:

2.2.4.2 The following issues should be covered clearly in the MOU process

- Highlight the institutional background of the partner(s) e.g. date established, location of main branch (and other branches, if relevant), profit or non-profit, public or private, accreditation body, disciplines, level of qualifications offered, ranking (if appropriate), other partners (if known), recognition by a professional or statutory accrediting agency.
- Identify the type of linkage being proposed, objectives, resource implications, and fit with the University/Educational Organization's strategic objectives.
- Outline the synergy between the proposed agreement and the Faculty/School/Centre/Unit's mandate and direction.

2.3 Strategic Alliances:

A University may enter into a strategic alliances with National and international partner Organizations.

2.3.1 The most in-depth agreement with another Higher Education Institution is the 'Strategic Alliance'. Strategic alliances can be defined as:

"A mutually beneficial long-term formal relationship formed between two or more parties to pursue a set of agreed upon goals or to meet a critical organizational need while remaining independent organizations. It is a synergistic arrangement whereby two or more organizations agree to cooperate in the carrying out of a business activity where each brings different strengths and capabilities to the arrangement":

2.3.2 Strategic alliances are the highest value relationships a University/Educational Organization can have with other institutions. They usually involve agreed developments in a number of areas. Strategic alliance partners must have a 'strategic fit' with the university. Having commitment and buy-in from the senior management of the partner institution is also vital.

2.3.3 International partnerships are solely based around a broad strategic fit with university strategy in potentially the following areas:

2.3.3.1 Research collaboration & pursuing funding opportunities.

2.3.3.2 Academic collaboration in Learning Innovation

2.3.3.3 Targeting of students in graduation, post-graduation or postdoctoral recruitment.

2.3.3.4 Joint ventures such as Public-Private partnerships.

2.3.3.5 Other elements such as student, staff swaps, guest speakers, networking.

2.4 Letters of Cooperation or Agreement

2.5 Adoption of Government facilities/ small government institutes – with the consent of Government with intention of providing better educational and health care facilities.

$$CGPA = \frac{\sum_{j=1}^m SGj NCj}{\sum_{j=1}^m NCj}$$

Where **NCj** is the number of total credits offered in the J^{th} semester, **SGj** is the SGPA earned in the J^{th} semester, where $j=1, 2, \dots, m$ are the number of semesters in that course.

- iv. On completing all requirements for award of the undergraduate certificate/ diploma/ degree, the CGPA will be calculated and this value will be indicated on the certificate/diploma/degree. The 3-years and 4-years undergraduate degrees should also indicate the Division obtained as per follows:

Division	Criterion

- vii. The percentage will be rounded off up to second decimal point.
- viii. The student will be examined by the university as per the prevailing syllabus and scheme of examination.
- ix. The candidate shall be awarded a certificate/diploma/degree when he/she successfully earns the minimum requisite credits for the certificate/diploma/degree.

Foundation Course

BACKGROUND

Homoeopathic Medical education in India requires the orientation of the new entrant to a basic philosophical orientation, a need to think in an integrated and holistic manner, an ability to function in a team at the bedside and a capacity to invest in a life-long learning pattern. Homoeopathy, though more than 250 years old, is relatively young as a scientific discipline and has attracted a number of negative community exposure due to a variety of reasons. In India, we are aware that the student who enters the portals of a homoeopathic college rarely does so out of his volition. It is often an exercise as the last choice or one which is adopted as a stepping stone to a 'medical' degree. Hence the mind-set of the new entrant is rarely informed, positive and self-affirming.

However, we know that like all medical disciplines, homoeopathy training includes a wide spectrum of domains that involves exposure to human interactions and interpersonal relationships in various settings including hospital, community, clinics etc. The training is intense and demands great commitment, resilience and lifelong learning. It is desirable to create a period of acclimatization and familiarization to the new environment. This would include an introduction to the course structure, learning methods, technology usage, and peer interactions which would facilitate their smooth transition from Junior college to homoeopathic college.

This is planned to be achieved through a dedicated 15 days exclusive "Foundation Course", at the beginning of the BHMS course to orient and sensitize the student to the various identified

areas.

Goals and Objectives

Broad goals of the Foundation Course in Homoeopathy include:

- 1) Orienting the students to various aspects of homoeopathic system of medicine.
- 2) Creating in them the conscious awareness of the 'Mission' as defined by Maste Hahnemann
- 3) Equipping them with certain basic, but important skills required for going through this professional course and taking care of patients.
- 4) Enhancing their communication, language, computer and learning skills.
- 5) Providing an opportunity for peer and faculty interactions and introducing an orientation to various learning methodologies.

Objectives

- a) **Orient the learner to:**
 - (i) The medical profession and the mission of a homoeopath in society
 - (ii) The BHMS programme
 - (iii) Vision and Mission of the Institute
 - (iv) Concept of Holistic and Positive health and ways to acquire and maintain it
 - (v) History of Medicine and Homoeopathy and the status of Homoeopathy in the world
 - (vi) Medical ethics, attitudes and professionalism
 - (vii) Different Health systems available in the country
 - (viii) Health care system and its delivery
 - (ix) National health priorities and policies
 - (x) Principles of primary care (general and community-based care)
 - (xi) Concept of mentorship programme
- b) **Enable the learner to appreciate the need to enhance skills in:**
 - (i) Language
 - (ii) Observation, documentation & understanding of basic medical technologies
 - (iii) Interpersonal relationships and Team behavior
 - (iv) Communication across ages and cultures
 - (v) Time management
 - (vi) Stress management

 - (ii) Basic life support
 - (iii) Universal precautions and vaccinations
 - (iv) Patient safety and biohazard safety
- d) **Language and Computer skills**

Content and Methodology

TheprogrammewillberuninSessions which mustbeinteractive.

The major components of the Foundation Course include:

- 1. Orientation Program:** This includes orienting students to all the components mentioned below with special emphasis on the role of Homoeopathy and homoeopath in today's times.
- 2. Skills Module (Basic):** This involves skill sessions such as Basic Life Support/ Emergency Management, First Aid, Universal Precautions and Biomedical Waste and Safety Management that students need to be trained prior to entering the patient care areas.
- 3. Field visit to Community and Primary Health Centre:** These visits provide orientation to the care delivery through community and primary health centres, and include interaction with healthcare workers, patients and their families.
- 4. Professional development including Ethics:** This is an introduction to the concept of Professionalism and Ethics and is closely related to Hahnemann's emphasis on the conduct of a physician. This component will provide students with understanding that clinical competence, communication skills and sound ethical principles are the foundation of professionalism. It will also provide understanding of the consequences of unethical and unprofessional behavior, value of honesty, integrity and respect in all interactions. Professional attributes such as accountability, altruism, pursuit of excellence, empathy, compassion and humanism will be addressed. It should inculcate respect and sensitivity for gender, background, culture, regional and language diversities. It should also include respect towards the differently abled persons. It introduces the students to the basic concept of compassionate care and functioning as a part of a healthcare team. It sensitizes students to "learning" as a behavior and to the appropriate methods of learning.
- 5. Enhancement of Language/Computerskills/**

Learning Skills:

These are sessions to provide opportunity for the students from diverse background and language competence to undergo training for speaking and writing English, fluency in local language and basic computerskills. The students should be sensitized to various learning methodologies such as small group discussions, skills lab, simulations, documentation and concept of Self-Directed learning.

This has to be further emphasized and intensified by providing exposure to field practice areas and training

during the internship period. The aim of the period of rural training during internship is to enable the fresh graduates to function efficiently under such settings.

- 1.1.5 The educational experience shall emphasize health and community orientation instead of only disease and hospital orientation or being-concentrated on curative aspects. As such all the basic concepts of modern scientific medical education are to be adequately dealt with.

- 1.1.12 The graduate medical education in clinical subjects shall be based primarily on out-patient teaching, emergency departments and within the community including peripheral health care institutions. The out-patient departments shall be suitably planned to provide training to graduates in small groups.

- 1.1.14 Proper records of the work shall be maintained which will form the basis for the students' internal assessment and shall be available to the inspectors at the time of inspection of the college by the National Medical Commission.
- 1.1.15 Maximal efforts shall be made to encourage integrated teaching between traditional subject areas using a problem based learning approach starting with clinical or community cases and exploring the relevance of various preclinical disciplines in both understanding and resolution of the problem. Every attempt shall be made to de-emphasize compartmentalisation of disciplines so as to achieve both horizontal and vertical integration in different

phases.

1.1.16 Every attempt shall be made to encourage students to participate in group discussions and seminars to enable them to develop personality, character, expression and other faculties which are necessary for a medical graduate to function either in solo practice or as a team leader when he begins his independent career. ORDINANCE NO. 112
POST GRADUATE DIPLOMA COURSE IN AUDITORY VERBAL THERAPY
(PGDAVT)
Regulations & Norms

1. PREAMBLE:

The ratification of the UN Convention on the Rights of Persons with Disabilities (Article 24) in 2007 by the Indian government and the passing of the 'The Right to Education Act (2009)' subsequently has brought a new direction to the field of management of deaf and hard of hearing individuals in the country. Professionals offering services to the deaf and hard of hearing must acquire the skills to adopt and use modern technology for the benefit of persons with hearing impairment. Rehabilitation Council of India (RCI) is India's apex body entrusted with the responsibility to regulate and monitor training of professionals in the area of disability. The Council has been designing, from time to time, training programs for the man power generation in different areas of disability. The RCI is in the process of implementation of the forward thinking concept of a barrier free environment for persons with disabilities as enunciated in the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) 2006.

The significant change that the UNCRPD (2006) has brought about is that issues regarding persons with disabilities will no longer be a medical or health care issue. On the other hand, they will be viewed as a human rights issue. However, majority of the training programs tend to focus more on disability than on the needs of differently abled children. The RCI has been designing training programs to accommodate this changed shift. One such program is the institution of a Post Graduate Diploma Course in Auditory Verbal Therapy for the training professionals in the fields of Speech & Hearing and Special Education. By its very definition, Auditory Verbal Therapy, highlights the similarities between hearing children and their deaf and hard of hearing peers and therefore uses normal patterns of development on which to base the habilitation of deaf and hard of hearing children. Inclusion / inclusive education lie at the very heart of Auditory Verbal Therapy and therefore, the new program is justified.

RCI plays a key role in linking tradition to modernity and its training courses for professionals are the bridges that enable the link. Post Graduate Diploma Course in Auditory Verbal Therapy will allow the professionals serving the deaf and hard of hearing in India to build on their knowledge and skills from their masters, graduation and diploma programs and to upgrade their knowledge.

Systematic and intensive training of the existing re/habilitation professionals is critical if India is to keep pace with international trends in the habilitation of deaf and hard of hearing children. International protocol recommends that training in Auditory Verbal therapy be given only by professionals who are themselves certified as LSLS Cert. AVT by the A.G. Bell Academy, an international organization. Therefore, this Post Graduate Diploma in Auditory Verbal Therapy should preferably follow the same modules of theory,

guided observation and practice of Auditory Verbal Therapy as taught in the training of LSLS Cert. AVT.

Across the world, all countries are working towards implementing the position statement of the Joint Committee on Infant Hearing, 2007. This 1-3-6 protocol specifies that with the help of universal newborn infant screening babies with hearing loss be identified by one month of age and be appropriately provided amplification facility by three months of age so that effective intervention begins at six months of age at the latest. By instituting this Post Graduate Diploma in Auditory Verbal Therapy, India will demonstrate through her apex regulatory body of RCI that she recognizes the need for focused training of re/habilitation professionals who serve deaf and hard of hearing babies in listening, learning and spoken language skills in order to comply with the 1-3-6 protocol and so become members of the global community.

2. AIMS AND OBJECTIVES:

The aim of the Post Graduate Diploma Course in Auditory Verbal Therapy is to train and equip professionals in the fields of Speech & Hearing and Special Education with knowledge and skills to practice auditory verbal therapy with young children with deafness and hard of hearing as a part of the early intervention program. The course further aims to facilitate professionals in setting up of early intervention centers staffed by therapists who have the requisite skills to work with deaf and hard of hearing children. The objectives of this program are to

- 2.1 Impart knowledge in modern technology and its significance in the practice of educating children with hearing impairment,
- 2.2 Identify the principles and practices of auditory verbal therapy and related services,
- 2.3 Develop skills and competencies for practicing auditory verbal therapy as a part of the early intervention services for young children with hearing impairment,

8. EXAMINATIONS:

8.1 Evaluation is a continuous process, which is based upon criteria developed by the concerned authorities with certain objectives to assess the performance of the learner. This also indirectly helps in the measurement of effectiveness and quality of the concerned B.D.S. programme.

8.2 Evaluation is achieved by two processes.

8.2.1 Formative or internal assessment: Formative evaluation is done through a series of tests and examinations conducted periodically by the institution.

8.2.2 Summative or university examinations: Summative evaluation is done by the university through examination conducted at the end of the specified course.

8.3 Methods of evaluation:

Evaluation may be achieved by the following tested methods:

8.3.1 Written test.

8.3.2 Practicals/ Clinical examination.

8.3.3 Viva voce

8.4 Internal assessment examination:

- 8.4.1 Minimum of 3 periodical internal assessment examination shall be conducted in each subject. If the teaching of subject is spread over in two years, at least one examination shall be conducted in first year of teaching. 10% of the total marks in each subject for both theory, practical and clinical examination separately should be set aside for the internal assessment examinations.
- 8.4.2 Average marks of three examinations shall be computed for the University examinations.
- 8.4.3 The Internal assessment examinations shall be conducted in proper manner on the dates announced in the examination schedule prepared at Institution level.
- 8.4.4 If repeater students desire for up gradation of their internal assessment marks, they shall appear again in one internal examination held during next six months. The new marks may be considered for University examinations.

8.5 SCHEME OF EXAMINATION:

- 8.5.1 The scheme of examination for B.D.S. Course shall be divided into 1st B.D.S. professional examination at the end of the first academic year, 2nd B.D.S. professional examination at the end of second year, 3rd B.D.S. professional examination at the end of third, 4th BDS examination at the end of 4th year.
- 8.5.2 There shall be two examinations in each academic year (Regular & Supplementary).
- 8.5.3 The examination shall be open to a candidate who satisfies the requirements of attendance, progress and other rules as laid down by the University.
- 8.5.4 Any candidate who fails in one subject in an examination is permitted to go to the next higher class and appears for the said failed subject and complete it successfully before he is permitted to appear for the next higher examination

8.6 WRITTEN EXAMINATION:

- 8.6.1 The written examination in each subject shall consist of one paper of three hours duration and shall have maximum marks of 70.

- 8.6.2 In the subjects of Physiology & Biochemistry and Pathology & Microbiology each paper will be divided into two parts, A and B of equal marks.
- 8.6.3 The question paper should contain different types of questions like essay, short answer and objective type / M.C.Q's.
- 8.6.4 The nature of questions set, should be aimed to evaluate students of different standards ranging from average to excellent.
- 8.6.5 The questions should cover as broad an area of the content of the course. The essay questions should be properly structured and the marks specifically allotted.
- 8.6.6 The University may set up a question bank.

8.7 PRACTICAL AND CLINICAL EXAMINATION:

- 8.7.1 Objective Structured Clinical Evaluation: The present system of conducting practical and clinical examination at several universities provide chance for unrealistic proportions of luck. Only a particular clinical procedure or experiment is usually given for the examination. The clinical and practical examination should provide a number of chances for the candidate to express one's skills. A number of examination stations with specific instructions to be provided. This can include clinical procedures, laboratory experiments, spotters etc. Evaluation must be made objective and structured. The method of objective structured clinical examinations should be followed. This will avoid examiner bias because both the examiner and the examinee are given specific instructions on what is to be observed at each station.
- 8.7.2 Records/ Log Books: The candidate should be given credit for his records based on the scores obtained in the record. The marks obtained for the record in the first appearance can be carried over to the subsequent appearances if necessary
- 8.7.3 Scheme of clinical and practical examinations: The specific scheme of clinical and practical examinations, the type of clinical procedures/ experiments to

be performed and marks allotted for each are to be discussed and finalized by the Chairman and other examiners and it is to be published prior to the conduct of the examinations along with the publication of the time table for the practical examinations. This scheme should be brought to the notice of the external examiner as and when the examiner reports. The practical and clinical examinations should be evaluated by two examiners of which one shall be an external examiner appointed from other universities preferably outside the State. Each candidate should be evaluated by each examiner independently and marks computed at the end of the examination

- 8.7.4 Viva Voce:** Viva voce is an excellent mode of assessment because it permits a fairly broad coverage and it can assess the problem solving capacity of the student. An assessment related to the affective domain is also possible through viva voce. It is desirable to conduct the viva voce independently by each examiner. In order to avoid vagueness and to maintain uniformity of standard and coverage, questions can be pre-formulated before administering them to each student. Twenty marks are exclusively allotted for viva voce and that can be divided equally amongst the examiners, i.e., 10 marks per examiner.

MARKS DISTRIBUTION IN EACH SUBJECT:

Each subject shall have a maximum of 200 marks.

Theory	100		
Practical/ Clinical	100

- 8.8.4 Successful candidates who obtain 65% of the total marks or more shall be declared to have passed the examination in First Class. Other successful candidates will be placed in Second Class. A candidate who obtains 75% and above is eligible for Distinction. Only those candidates who pass the whole examination in the first attempt will be eligible for distinction or class.
- 8.8.5 First Class and Distinction etc. to be awarded by the University as per their

respective rules.

8.9 Grace Marks: Grace marks may be awarded to students who have failed only in one subject but passed in all other subjects as per University Policy.

8.10 Re-evaluation: The objective of re-evaluation is to ensure that the student receives a fair evaluation in the university examination and to minimize human error and extenuating circumstances. There shall be two mechanisms for this purpose.

8.10.1 Re-totaling: The University on application and remittance of a stipulated fee to be prescribed by the university, shall permit a recounting or opportunity to recount the marks received for various questions in an answer paper/papers for theory of all subjects for which the candidate has appeared in the university examination. Any error in addition of the marks awarded if identified should be suitably rectified.

Where **ci** is the number of credits offered in the **ith** subject of a semester for which SGPA is to be calculated, **pi** is the corresponding Grade Point (GP) earned in the **ith** subject, where **i= 1,2n** are the number of subjects in that semester.

- iii. CGPA is a measure of overall cumulative performance of a student over all the semesters completed. The CGPA is the ratio of total credit points secured by a student in various courses in all the semesters completed and the sum of the total credits of all courses in all the semesters completed, i.e.

$$CGPA = \frac{\sum_{j=1}^m SGj NCj}{\sum_{j=1}^m NCj}$$

Where **NCj** is the number of total credits offered in the **Jth** semester, **SGj** is the SGPA earned in the **Jth** semester, where **j=1, 2 m** are the number of semesters in that course.

- iv. On completing all requirements for award of the undergraduate certificate/ diploma/ degree, the CGPA will be calculated and this value will be indicated on the certificate/diploma/degree. The 3-years and 4-years undergraduate degrees should also indicate the Division obtained as per follows:

Where **ci** is the number of credits offered in the i^{th} subject of a semester for which SGPA is to be calculated, **pi** is the corresponding Grade Point (GP) earned in the i^{th} subject, where $i=1, 2, \dots, n$ are the number of subjects in that semester.

- iii. **CGPA** is a measure of overall cumulative performance of a student over all the semesters completed. The CGPA is the ratio of total credit points secured by a student in various courses in all the semesters completed and the sum of the total credits of all courses in all the semesters completed, i.e.

$$\text{CGPA} = \frac{\sum_{j=1}^m SGj NCj}{\sum_{j=1}^m NCj}$$

Where **NCj** is the number of total credits offered in the J^{th} semester, **SGj** is the SGPA earned in the J^{th} semester, where $j=1, 2, \dots, m$ are the number of semesters in that course.

- iv. On completing all requirements for award of the undergraduate certificate/ diploma/ degree, the CGPA will be calculated and this value will be indicated on the certificate/diploma/degree. The 3-years and 4-years undergraduate degrees should also indicate the Division obtained as per follows:

Division	Criterion

First division	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 6.00 above but less than 7.5
Second division	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 5.00 or above but less than 6.00

- v. The conversion of CGPA into percentage will be as follow to facilitate its application in other academic matters:

Where NCj is the number of total credits offered in the J^{th} semester, SGj is the SGPA earned in the J^{th} semester, where $j = 1, 2, \dots, m$ are the number of semesters in that course.

- iv. On completing all requirements for award of the undergraduate certificate/ diploma/ degree, the CGPA will be calculated and this value will be indicated on the certificate/diploma/degree. The 3-years and 4-years undergraduate degrees should also indicate the Division obtained as per follows:

Division	Criterion

Second division	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 5.00 or above but less than 6.00

- v. The conversion of CGPA into percentage will be as follow to facilitate its application in other academic matters:

- i. The Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA) will be calculated as weighted average of credit points secured by the student, except the credits of additional courses, if any. The, SGPA and CGPA shall be rounded off up to 2 decimal places and reported in the grade sheet.
- ii. **SGPA** is a measure of performance of the student in a semester. It is ratio of total credit points secured by a student in various courses registered in a semester and the total course credits taken during that semester, i.e.

$$SGPA = \frac{\sum_{i=1}^n ci pi}{\sum_{i=1}^n ci}$$

Where **ci** is the number of credits offered in the **ith** subject of a semester for which SGPA is to be calculated, **pi** is the corresponding Grade Point (GP) earned in the **ith** subject, where **i= 1,2n** are the number of subjects in that semester.

- iii. CGPA is a measure of overall cumulative performance of a student over all the semesters completed. The CGPA is the ratio of total credit points secured by a student in various courses in all the semesters completed and the sum of the total credits of all courses in all the semesters completed, i.e.

$$CGPA = \frac{\sum_{j=1}^m SGj NCj}{\sum_{j=1}^m NCj}$$

Where **NCj** is the number of total credits offered in the **Jth** semester, **SGj** is the SGPA earned in the **Jth** semester, where **j=1, 2 m** are the number of semesters in that course.

- iv. On completing all requirements for award of the undergraduate certificate/ diploma/ degree, the CGPA will be calculated and this value will be indicated on the certificate/diploma/degree. The 3-years and 4-years undergraduate degrees should also indicate the Division obtained as per follows:

Division	Criterion
First division with distinction	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 7.50 or above
First division	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 6.00 above but less than 7.5
Second division	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 5.00 or above but less than 6.00

- v. The conversion of CGPA into percentage will be as follow to facilitate its application in other academic matters:
- vi. Equivalent Percentage = CGPA x 10
- vii. The percentage will be rounded off up to second decimal point.
- viii. The student will be examined by the university as per the prevailing syllabus and scheme of examination.
- ix. The candidate shall be awarded a certificate/diploma/degree when he/she successfully earns the minimum requisite credits for the certificate/diploma/degree.
- x. A Grade Card shall be issued to all the students after every semester based on the grades earned. The course details (code, title, number of credits, grade secured) along with SGPA of every semester and CGPA earned till that Academic Year will be displayed in the grade card.

19) Credit Transfer:

$$\text{SGPA} = \frac{\sum_{i=1}^n ci pi}{\sum_{i=1}^n ci}$$

Where **ci** is the number of credits offered in the **ith** subject of a semester for which SGPA is to be calculated, **pi** is the corresponding Grade Point (GP) earned in the **ith** subject, where **i= 1,2n** are the number of subjects in that semester.

- iii. **CGPA** is a measure of overall cumulative performance of a student over all the semesters completed. The CGPA is the ratio of total credit points secured by a student in various courses in all the semesters completed and the sum of the total credits of all courses in all the semesters completed, i.e.

$$\text{CGPA} = \frac{\sum_{j=1}^m \text{SGj} \text{NCj}}{\sum_{j=1}^m \text{NCj}}$$

Where **NCj** is the number of total credits offered in the **Jth** semester, **SGj** is the SGPA earned in the **Jth** semester, where **j=1, 2 m** are the number of semesters in that course.

- iv. On completing all requirements for award of the undergraduate certificate/ diploma/ degree, the CGPA will be calculated and this value will be indicated on the certificate/diploma/degree. The 3-years and 4-years undergraduate degrees should also indicate the Division obtained as per follows:

Division	Criterion
First division with distinction	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 7.50 or above
First division	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 6.00 above but less than 7.5
Second division	The candidate has earned minimum number of credits required for the award of the degree with CGPA of 5.00 or above but less than 6.00

- v. The conversion of CGPA into percentage will be as follow to facilitate its application in other academic matters:
- vi. Equivalent Percentage = CGPA x10
- vii. The percentage will be rounded off up to second decimal point.
- viii. The student will be examined by the university as per the prevailing syllabus and scheme of examination.
- ix. The candidate shall be awarded a certificate/diploma/degree when he/she successfully earns the minimum requisite credits for the certificate/diploma/degree.

Annexure -I**Foundation Course****BACKGROUND**

Homoeopathic Medical education in India requires the orientation of the new entrant to a basic philosophical orientation, a need to think in an integrated and holistic manner, an ability to function in a team at the bedside and a capacity to invest in a life-long learning pattern. Homoeopathy, though more than 250 years old, is relatively young as a scientific discipline and has attracted a number of negative community exposure due to a variety of reasons. In India, we are aware that the student who enters the portals of a homoeopathic college rarely does so out of his volition. It is often an exercise as the last choice or one which is adopted as a stepping stone to a 'medical' degree. Hence the mind-set of the new entrant is rarely informed, positive and self-affirming.

However, we know that like all medical disciplines, homoeopathy training includes a wide spectrum of domains that involves exposure to human interactions and interpersonal relationships in various settings including hospital, community, clinics etc. The training is intense and demands great commitment, resilience and lifelong learning. It is desirable to create a period of acclimatization and familiarization to the new environment. This would include an introduction to the course structure, learning methods, technology usage, and peer interactions which would facilitate their smooth transition from Junior college to homoeopathic college.

This is planned to be achieved through a dedicated 15 days exclusive "Foundation Course", at the beginning of the BHMS course to orient and sensitize the student to the various identified areas.

Goals and Objectives

Broad goals of the Foundation Course in Homoeopathy include:

- 1) Orienting the students to various aspects of homoeopathic system of medicine.
- 2) Creating in them the conscious awareness of the 'Mission' as defined by Master Hahnemann
- 3) Equipping them with certain basic, but important skills required for going through this professional course and taking care of patients.
- 4) Enhancing their communication, language, computer and learning skills.
- 5) Providing an opportunity for peer and faculty interactions and introducing an orientation to various learning methodologies.

Objectives**a) Orient the learner to:**

- (i) The medical profession and the mission of a homoeopath in society
- (ii) The BHMS programme
- (iii) Vision and Mission of the Institute
- (iv) Concept of Holistic and Positive health and ways to acquire and maintain it

- (v) History of Medicine and Homoeopathy and the status of Homoeopathy in the world
 - (vi) Medical ethics, attitudes and professionalism
 - (vii) Different Health systems available in the country
 - (viii) Health care system and its delivery
 - (ix) National health priorities and policies
 - (x) Principles of primary care (general and community-based care)
 - (xi) Concept of mentorship programme
- b) Enable the learner to appreciate the need to enhance skills in:**
- (i) Language
 - (ii) Observation, documentation & understanding of basic medical technologies
 - (iii) Interpersonal relationships and Team behavior
 - (iv) Communication across ages and cultures
 - (v) Time management
 - (vi) Stress management
 - (vii) Use of information technology
- c) Train the learner to provide:**
- (i) First-aid/ Emergency management
 - (ii) Basic life support
 - (iii) Universal precautions and vaccinations
 - (iv) Patient safety and biohazard safety
- d) Language and Computer skills**
- (i) Local language programme
 - (ii) English language programme
 - (iii) Computer skills

These may be arranged as per the needs of the particular batch and extra coaching may be continued after the Foundation programme

Content and Methodology

The programme will be run in Sessions which must be interactive.

The major components of the Foundation Course include:

- 1. Orientation Program:** This includes orienting students to all the components mentioned below with special emphasis on the role of Homoeopathy and homoeopath in today's times.
- 2. Skills Module (Basic):** This involves skill sessions such as Basic Life Support/ Emergency Management, First Aid, Universal Precautions and Biomedical Waste and Safety Management that students need to be trained prior to entering the patient care areas.

3. **Field visit to Community and Primary Health Centre:** These visits provide orientation to the care delivery through community and primary health centres, and include interaction with health care workers, patients and their families.
4. **Professional development including Ethics:** This is an introduction to the concept of Professionalism and Ethics and is closely related to Hahnemann's emphasis on the conduct of a physician. This component will provide students with understanding that clinical competence, communication skills and sound ethical principles are the foundation of professionalism. It will also provide understanding of the consequences of unethical and unprofessional behavior, value of honesty, integrity and respect in all interactions. Professional attributes such as accountability, altruism, pursuit of excellence, empathy, compassion and humanism will be addressed. It should inculcate respect and sensitivity for gender, background, culture, regional and language diversities. It should also include respect towards the differently abled persons. It introduces the students to the basic concept of compassionate care and functioning as a part of a health care team. It sensitizes students to "learning" as a behavior and to the appropriate methods of learning.
5. **Enhancement of Language / Computer skills / Learning Skills:** These are sessions to provide opportunity for the students from diverse background and language competence to undergo training for speaking and writing English, fluency in local language and basic computer skills. The students should be sensitized to various learning methodologies such as small group discussions, skills lab, simulations, documentation and concept of Self-Directed learning.
